ABSTRACT

This report provides a comprehensive and accurate overview of the numbers, institutions, types of awards, and program areas involved in the granting of degrees and certificates in Oregon's postsecondary institutions of education. Oregon's postsecondary institutions conferred a total of 29,559 degrees and certificates during the past year. These were awarded in the following six categories: first professional, bachelor, master, doctor, associate, and certificate. Certificates comprised the largest number of awards granted, with 11,761 in this category. The number of degrees granted in the other categories include: bachelors' degrees--10,435; associate degrees--3,239; masters' degrees--2,915; first professional degrees--685; and doctorates--524. DEGREES AND AWARDS GRANTED IN POSTSECONDARY INSTITUTIONS IN OREGON 1972-73

INTRODUCTION

The Educational Coordinating Council annually publishes information concerning degrees and certificates granted in Oregon's postsecondary institutions of education. The intent of these reports is to provide a comprehensive and accurate overview of the numbers, institutions, types of awards, and program areas involved in the granting of these degrees and certificates. This report deals specifically with degrees and awards granted during the time period, July 1, 1972 through June 30, 1973, by Oregon's public and Oregon's private and independent colleges and universities. Data for certificates granted by Oregon's private vocational schools is reported for the time period, October 1, 1972 through September 30, 1973.

In the summary section of this report, a brief discussion of data pertaining to each particular degree and award category granted during the past year is presented. The tables in Appendix A give a detailed presentation of the degrees and awards granted in Oregon's postsecondary institutions during the 1972-73 school year, and Appendix B provides a list of all the institutions included in this report.

Data pertaining to the number of degrees and certificates granted in the colleges and universities are collected using a

survey instrument from the Higher Education General Information Survey (HEGIS). This survey instrument was developed by the U.S. Office of Education and is designated form 2300-2.1(3/73), "Degrees and Other Formal Awards Conferred Between July 1, 1972 and June 30, 1973". This form is organized into three parts: Part A, First Professional Degrees in Selected Fields; Part B, Bachelor's, Master's, and Doctor's Degrees; and Part C, Degrees and Awards Based on Less Than Four Years of Work Beyond High School. Information on the degrees and certificates awarded was provided by the institutions and is summarized in this report in the HEGIS format.

For purposes of presenting data in this report, individual programs have been summarized under the appropriate general program area. These general program areas are as follows:

For Academic Programs:

Humanities

- Communications
- Fine and Applied Arts
- Foreign Languages
- Letters

Education

- Education

Social Science

- Psychology
- Public Affairs and Services
- Social Sciences

Professional

- Architecture
- Business and Management
- Engineering
- Health Professions
- Home Economics
- Law
- Library Science
- Military Science
- Theology

Science

- Agriculture and Natural Science
- Biological Sciences
- Computer and Information Sciences
- Mathematics
- Physical Science

Multidisciplinary Programs

- Area Studies
- Interdisciplinary Studies

For Vocational Programs:

- Business and Commerce
- Data Processing Technologies
- Health Services and Paramedical Technologies
- Mechanical and Engineering Technologies
- Natural Science Technologies
- Public Service-Related Technologies

Information about number of certificates granted by the private vocational schools was gathered by using a survey developed by the Educational Coordinating Council. This survey identifies programs offered, current enrollments and number of completions in the various programs of these schools. This year a total of 77 percent of the private vocational schools reported number of completions.

In making the decision to implement a new program or eliminate an old program, one critical step is to assess the contribution of the programs in terms of statewide educational objectives. This necessitates having a knowledge of what programs are being offered and the level of output in these programs. It is the purpose of this report to provide this information to educational policy-makers in institutions of higher education and to those at a state level.

The Educational Coordinating Council is grateful to those institutions in each educational segment which supplied the information contained in this report.

This project was supported in part by funds received from the Division of Academic Facilities of the U.S. Office of Education.

A SUMMARY OF DEGREES AND AWARDS GRANTED 1972-73

Oregon's postsecondary institutions conferred a total of 29,559 degrees and certificates during the past year. These were awarded in the following six categories: First Professional, Bachelor, Master, Doctor, Associate, and Certificate. Certificates comprise the largest number of awards granted with 11,761 in this category. The number of degrees granted in the other categories is as follows: Bachelor's Degrees--10,435; Associate Degrees--3,239; Master's Degrees--2,915; First Professional Degrees--685; and Doctorates--524.

During the 1972-73 school year, Oregon's public institutions conferred 16,150 degrees and certificates or 54.6 percent of the total awarded. The Department of Higher Education's institutions awarded 12,341 degrees and certificates or 41.7 percent of the total awarded, while public community colleges awarded 3,809 or 12.9 percent of the total. Private colleges and universities conferred a total of 2,860 degrees and certificates or 9.7 percent of the total, and private vocational institutions conferred 10,549 certificates which is 35.7 percent of the total number.

A brief summary of data pertaining to each particular degree is presented in the following paragraphs. Information contained in the tables of Appendix A provides the basis for this discussion, plus some additional information from previous reports on degrees granted.

First Professional Degrees

First professional degrees signify those which specifically prepare a person for entrance into a certain profession. Programs in this category are based on at least two academic years of previous college work for entrance, and a total of at least six academic years of college work for completion.

Table A.1 in the appendix shows that 685 first professional degrees were conferred among eight institutions during the 1972-73 school year. This represents a 31.5 percent increase in first

professional degrees conferred over last year's total. Women earned 32 degrees (4.7%) and men earned 653 degrees (95.3%). These degrees were awarded in five fields of study: Dentistry (78 degrees); Medicine (80 degrees); Law (394 degrees); Optometry (71 degrees); and Theology (62 degrees).

Bachelor's Degrees

As shown in Table A.4 in Appendix A, nine public and 16 private and independent colleges and universities granted 10,435 bachelor's degrees during the 1972-73 school year. Of the total bachelor's degrees conferred, men earned 6,133 (58.8%), while women earned 4,302 (41.2%). The total of 10,435 bachelor's degrees granted represents only a .3 percent increase over the 10,399 bachelor's degrees granted in the 1971-72 school year.

Public institutions granted 8,569 bachelor's degrees or 82.1 percent of the total number, while private and independent institutions granted 1,866 degrees or 17.9 percent of the total. The three institutions granting the greatest number of bachelor's degrees were Oregon State University (2,711), the University of Oregon (2,289) and Portland State University (1,628). The bachelor's degrees conferred by these three institutions represent 63.5 percent of the total number conferred. Within the private sector, Lewis and Clark College granted the most bachelor's degrees with 337, while the University of Portland granted 308 and Willamette University 212.

The percentage distribution of bachelor's degrees granted among program areas is as follows: Humanities--11.8%; Education--21.0%; Social Science--23.7%; Professional--24.5%; Science--11.0%; and Multidisciplinary Programs--8.0%.

Master's Degrees

Master's Degrees were granted at eight public institutions and ten private institutions during the 1972-73 school year (Table A.5). Of the total number of these degrees conferred, 1,765 (60.5%) were awarded to men, while 1,150 (39.5%) were awarded to women. The total of 2,915 master's degrees awarded in 1972-73 represents a decrease of 9.5 percent from the 3,222 conferred during the 1971-72 school year.

Public institutions conferred a total of 2,541 (87.2%) master's degrees and the private and independent colleges conferred 374 or 12.8 percent of the total number granted. Three public institutions account for 74.9 percent of all master's degrees granted. These are the University of Oregon (1,042), Oregon State University (609), and Portland State University (531). Among the private colleges and universities, the greatest number of master's degrees was awarded by the University of Portland (166), with Lewis and Clark (137) and Linfield College (21) following.

By far, the greatest number of master's degrees was granted in the area of Education--1,363 or 46.8 percent. Among the remaining

program areas, the distribution of master's degrees is as follows: Humanities--9.7%; Social Science--10.1%; Professional--14.0%; Science--11.0%; and Multidisciplinary Programs--8.4%.

Doctor's Degrees

A total of four public universities and one private university conferred doctor's degrees during the 1972-73 school year. These institutions granted a total of 524 degrees in the doctorate category (Table A.6). This represents an 8.6 percent decrease in doctor's degrees awarded over the 1971-72 school year. Of the total degrees awarded, men received 451 or 86.1 percent of the total conferred, and women received 73 or 13.9 percent of the total number.

Over half of the total number of doctor's degrees--328 or 62.6 percent--was conferred by the University of Oregon. Oregon State University conferred 175 doctorates or 33.4 percent of the total number, while the University of Oregon Medical School contributed eight doctor's degrees or 1.5 percent of the total number. The University of Portland awarded 12 doctor's degrees and was the only private institution to award a degree in the doctorate category.

Education and Science comprise the program areas where the greatest number of doctor's degrees were conferred; Education accounting for 34.2 percent of the total number and Science accounting for 30.3 percent of the total. The percentage distribution among the remaining program areas is: Humanities--13.4%; Social Science--

16.9%; Professional--4.6%; and Multidisciplinary Programs--.6%.

Associate Degrees

As shown in Table A.9 in Appendix A, associate degrees were granted at twenty-one different institutions during the 1972-73 academic year. All of the thirteen community colleges awarded associate degrees, while four private institutions and four State Department of Higher Education institutions awarded this degree.

A total of 3,239 associate degrees was awarded during the 1972-73 school year. This represents a 5.1 percent increase over the 3,081 awarded during the 1971-72 school year. Community colleges awarded 2,669 associate degrees or 82.4 percent of the total number, while the State Department of Higher Education institutions and the private and independent colleges granted 13.1 percent and 4.5 percent of all associate degrees respectively.

The associate degree was awarded to students completing both occupational and non-occupational programs of study. Associate degrees in non-occupational or college transfer programs account for 25.4 percent of the total number of associate degrees awarded, while the occupational program area constitutes 74.6 percent of the total. Among occupational programs, the largest number of associate degrees was granted in the program area of Mechanical Engineering Technology, which accounts for 24.2 percent of the total associate degrees awarded. Health Services and Business and Commerce follow

as program areas granting the largest number of associate degrees accounting for 14.9 percent and 14.1 percent of the total respectively.

Certificates

During the 1972-73 school year, 11,761 certificates were awarded in Oregon's post-secondary institutions (Table A.10). This total represents approximately a 20 percent increase over the total number of certificates awarded last year. Since the bulk of certificates are granted by private vocational schools, this increase could be, in part, due to the greater response rate of these schools reporting completions this year (77%) than last year (68%).

The private vocational institutions granted 10,549 certificates during the past year or 89.7 percent of all certificates earned. Public community colleges granted 1,140 certificates or 9.7 percent of the total number. Among the community colleges, Portland Community College granted the most certificates (391). The only institutions to grant certificates among the colleges and universities were from the private and independent educational segment. These schools were Multnomah School of the Bible (64) and Western Conservative Baptist Seminary (8). This represents only .6 percent of the total certificates awarded.

By far, the greatest number of certificates was granted in the program area of Business and Commerce (66.7%). Mechanical Engineering Technologies and Health Services follow as areas of study granting the greatest number of certificates.

Conclusion

It is the hope of the Educational Coordinating Council that this publication will provide useful information to those involved in educational planning. However, it should be emphasized that the data and analysis presented in this report reflect only a part of the actual educational program output produced by Oregon's postsecondary institutions of education. Many students receive the benefits of training in institutions of higher education who never receive official awards.

The tables that follow in Appendix A offer a more detailed and complete presentation of the degrees and awards granted in Oregon's postsecondary institutions during the 1972-73 school year.
